The screenshot shows the Saylor.org website interface. The top navigation bar includes the Saylor.org logo, a search bar, and links for Course Catalog, My courses, Programs, and Help. The main content area displays the course 'CS105: Introduction to Python'. The course details include a time of 36 hours, 3.6 CEUs, and a free certificate. The course description states: 'This course is an introduction to fundamental programming concepts by way of the Python 3 programming language. Python 3 is a high-level interpreted language that has many benefits, including easy-to-read and easy-to-write syntax and powerful libraries that provide additional functionality. Even though Python 3 is a great programming language for beginners, it is also used extensively for practical applications in engineering and data science. This course is intended for people with no or very little prior programming experience. It covers a range of topics, such as data types, control flow, functions, file operations, and object-oriented programming. When you finish this course, you will be able to create Python programs for a variety of applications.' A link to the 'Course Syllabus' is provided at the bottom of the main content area. The sidebar on the left shows the course introduction and unit 1, which includes sections for '1.1: Introduction to Python', '1.2: Accessing the Repl...', and '1.3: Python 3 Data Typ...'. The bottom of the screenshot shows a Windows taskbar with various application icons and system tray information.
